

## **Question:**

Can you calculate the total distance covered by the object in the video?

## **Ground Truth:**

The total distance traveled by the given object is **20.15 meters**.

# **GPT-4V:**

... without ... exact environmental measurements here, any approximation would be highly speculative ... spatial analysis software would be required.

# ST-VLM (Ours):

The given object's traveled distance is **21.04 m**.
